

PROPERTY COMMITTEE REPORT

Church Board Mtg. 4/18/2021

by Dick Busic, Chair

The Property Committee has been quiet for the last period while the Transition Team has been at work helping us as a congregation determine who we are and who we choose to be and to do as God calls us.

We worked about three years looking carefully at our property and buildings (1911) & (1966). We gained important information about safety in our structures and ability to allow time and enough egress to safely allow us to leave the building should we have an earthquake and or a fire or an attack on our congregation (for who we are).

This information will be shared as we continue on a journey of considering our purpose and need for building space.

We have deliberately not shared our thoughts about possibilities. However we have been collecting ideas and directions we could go as a congregation. The time to do so will become evident.

The one thing we have heard from others in transition is that we should not be in a hurry about “building(s)” or where we will meet when it is possible to gather again in person.

We have excellent leadership and will be bringing insights from others experienced in the transition process.

Leaving behind what was and waiting to experience what could be puts us in a period that seems to move slow. It is the hardest part of a transition. The wait is worth our while. It will come with new excitement and energy. (Wait for it. . . wait for it!) It will come.
